

ABOUT US

I-MACONI Nigeria Limited was incorporated in 1992 as a trading and service company. I-Maconi commenced business in the field of water purification services in 2005 with a clear vision to provide quality end-to-end solutions in the field of water purification and allied services. Our strategic focus is in providing enhanced customer satisfaction through consistent innovative solutions and excellent services.

I-MACONI Nigeria Limited is a leading provider with core competencies in the supply, installation and maintenance of water purification systems and treatment solutions; sales and after sales service of MACONI brand water dispenser systems, Reverse Osmosis Systems; Bore-hole drilling and Irrigation; as well as Consulting in areas of Water Purification Science and Engineering.

I-MACONI has a strong focus in water engineering solutions. From surveys and studies, installation of hydrological network to planning, design and construction supervision, the firm has developed expertise and has acquired considerable experience on water resources development.

We are competent in providing excellent services for our vast clientele at affordable costs. Today the

company has leveraged its expertise in providing outstanding quality, to become a well-recognized name in the industry. Our commitment to quality is backed by full warranty on all products and services; and our support team of engineers is ever ready to support our customers either remotely or at the customer's location when needed.

I-MACONI has an alliance with the most comprehensive array of partners who have technical expertise in water purification and waste water management solutions.

MISSION STATEMENT

To offer proven cutting-edge water treatment technology that is employed worldwide and can be integrated safely, wisely and economically in satisfying the needs of our client. We will constantly strive to satisfy our customers' needs and conduct our business in a manner to produce financial returns that encourage and reward our shareholders.

VISION STATEMENT

To be a household name in Nigeria by providing everyone possible in both rural and urban areas with safe drinking water using environment friendly solutions in water purification science by the year 2020.

ABOUT US

To drive our vision, we have aligned with world class leaders to build a partnership that works. We are committed to these partnerships with a view to provide products and services that best suit our environment. This synergy enables us to say that “we act locally while our partners and along with us think globally”.

We are continually creating a challenging and motivating environment for our staff as well as striving to build bridges using modern technology to link all our offerings to our customers.

Today, we are renowned for our excellence and quality in products and services. This strength is already earning us a pre-eminent leadership position as one of the water purification service groups operating in the Nigeria.

We offer our clients the opportunity to purchase fully configured and installed water and waste water solutions with built-in future-proofing, regardless of the size of installation, from a single site to multi-site roll outs, requiring stage managed implementation. We will only recommend and offer you a solution that is entirely appropriate for your needs – designed with the future in mind.

The activities of the firm within the water engineering division are conveniently covered under the following fields:

- Geophysical Survey
- Borehole drilling and storage tanks
- Supply and installation of pumps, casing and screens
- Rehabilitation of water supply schemes
- Hydrology and water resources development
- Irrigation
- Pumping test and pressure testing services

We continually look to ensure that we provide our clients with the best solutions and consultancy

services to meet their water purification needs.

AIMS AND OBJECTIVES:

- It is part of I-MACONI's objectives to contribute its quota to the Government policy of Supplying potable water to Nigerian populace.
- To develop a team relationship with our clients. Providing the most reliable, honest, well engineered solutions to problems and together achieve higher levels of productivity and profitability with the business ethics.
- Establishing accurate control measurements.
- To ensure customers confidence through timely service and practical solution at a cost effective price
- Work safely and in consonance with environment laws and bylaws.

PRODUCTS & SERVICES

- Bore-Hole Drilling, Installation and Maintenance of Water Treatment Plant
- Consulting in areas of Water Purification Science and Engineering
- Supply of Purified water (75cl and 19litre Jars)
- Assembly and supply of water purification systems, Reverse Osmosis Systems, Water Bottling Lines, Injection Mould Machines and PET Blowers
- Supply, servicing and repairs of water Dispenser Machines

ABOUT US

OUR PEOPLE

SIR MISHAEL IWUAGWU: CHAIRMAN

He is the Chairman of Maconi Group Limited, parent company of I-Maconi Nigeria Limited. Sir Mishael Iwuagwu graduated from the University of Nigeria, Nsukka, Enugu State. Post-graduation, he joined the services of the Nigerian Customs Service (NCS). At the NCS, Sir Mishael distinguished himself meritoriously and held the positions of Area Comptroller at the Murtala Mohammed International Airport; Area Comptroller at Lily Pond Container Terminal, Apapa, Lagos.

He was later posted to head the Command Training College in Kano, from whence he retired in 2004. As Chairman, he has grown the group into a multi-faceted conglomerate with interests in telecommunications, real estate, haulage and logistics and beverages..

LADY RAL IWUAGWU: DIRECTOR

Lady Ral Iwuagwu is an alumnus of the University of Ibadan, where she graduated with honours with a B.Sc in Biochemistry. She also holds an M.Sc in Biochemistry from the University of Lagos.

Lady Ral started her career in the Public Service. She joined the services of the Federal Ministry of Health in 1975 and then transferred to the National Food and Drug Administration and Control (NAFDAC) in 1993. She retired from the services of NAFDAC in 2002, as a Deputy Director.

Lady Ral Iwuagwu brings her wealth of experience in the health sector to the company in terms of keeping up with the best industry standards in the food and beverage industry. Lady Ral is a director of I-Maconi Nigeria Limited.

IHEANYICHUKWU IWUAGWU: MANAGING DIRECTOR

Iheanyichukwu Iwuagwu graduated from the University of Nigeria, Nsukka, where he finished with honours with a B.A in Philosophy. He is a graduate member of the Nigerian Institute of Management (NIM) and is an alumnus of the Fate Foundation's Aspiring Entrepreneurs Programme Class 26 and the Emerging Entrepreneurs Programme. He started his working career with I-Maconi Nigeria Limited (Haulage Division), as Operations Director, a position he held till 2006. In 2006, he was appointed the Managing Director of the ailing beverages division. In the last three years, he has grown the product portfolio of this division to include packaging and sales of 50cl, 75cl and 19L water bottles and also introduced an aggressive marketing strategy that has increased the division's client portfolio to include Globacom, Costain West Africa PLC, Zenith Bank, ETB, Standard Alliance Group etc.

Iheanyi Iwuagwu also founded the water purification systems sales, services and consultancy department of I-Maconi Nigeria Ltd. The department is charged with the responsibility of sales and after sales service of Maconi brand water dispenser machines, installation and service of water purification systems and consulting services on water purification projects.

As an astute entrepreneur, Iheanyi has been involved in several successful start-up businesses. His interests in business cut across Real Estate, ICT ePayments, Logistics and hospitality where he sits on the board of these companies.

Wherever he finds himself in business or management, Iheanyi brings on board his wealth of experience. His

OUR PEOPLE

experience spans across management and business strategy with a particular focus on wealth creation through innovation.
